Internal & External M2M^{FD}

Steel fire doorsets, approved by Efectis for up to 240 mins

About M2M^{FD}

The M2M^{FD} range offers an extensive series of fire doors, available with varying levels of security and a wide range of options to suit application and customer requirements.

M2M^{FD} doorsets are available with a fire rating up to FD240, providing integrity fire resistance for up to 240 minutes, certified by Efectis to EN 14351-1 & EN 16034 (certificate numbers CE: 1812-CPR-1936; UKCA: 2822-UKCA-CPR-0020) for external application and “Efectis Certified” third party certification scheme (certificate number EFR-2506-0450) for internal application.

To achieve this fire rating, the doors were subjected to a furnace test, withstanding temperatures of up 1100°C for a period in excess of four hours.

Combining solutions for fire and security, the M2M^{FD} range includes doorsets with LPCB certification to LPS 1175 Security Rating 2, 3 and 4. We also offer a variety of fire doors which are Secured by Design approved.
